

## Chinker's Edge Color Chart

Available in 30 oz. cartridges and 5-gallon pails.

### Available Colors:

Light Gray

Mortar White

Khaki

Buff

Pecan

### Estimation Guide for Chinking:

Lineal feet per full gallon (231 cu. in.)		Width of Joint							
		1/2"	1"	1 1/2"	2"	2 1/2"	3"	3 1/2"	4"
Depth of Joint	1/4"	154	77	51	39	31	25	22	19
	3/8"	102	51	34	25	20	17	14	13
	1/2"	77	39	25	19	15	13	11	9

You may calculate total gallons needed by finding the feet per gallon and dividing your lineal feet by that number.

**Example:** Joint size is 4" x 3/8". This chart indicates that one gallon will chink 13 feet. If there are 5,500 lineal feet to be chinked, divide 5,500 by 13 to get 423 gallons.

Although this chart is rounded up where needed, it does not include waste. Keep in mind that the depth is an average depth across the joint. We tend to think of the depth in the middle of the joint where it is actually the thinnest. If your estimations are generally short, check to see that you use average joint depth.
